

DOING MORE WITH LESS IN THE NHS: IMPOSSIBLE BECOMES THE NEW MINIMUM STANDARD

The Issues

It is no secret that the NHS has savings to make. Budgets are decreasing in real terms and there is added pressure to achieve.

Initiatives like the 'NHS Standards of Procurement' are ambitious, but they demand savings that cannot be delivered using the existing infrastructure.

Even worse are rules based regulations coming out of public inquiries, like the one following Midstaffs. They are not only detrimental for staff morale, but force managers to make poor decisions based on restrictive rules, not evidence.

"Trusts need to find over £1.5 billion of procurement efficiencies over the next three years."

Dan Poulter, Parliamentary Under Secretary of State for Health

The Solution

You *could* achieve more with less if you could just see everything clearly. Decisions based on the complete picture give the best results, but this picture is surprisingly hard to piece together.

The best method is to use Business Intelligence software to gather your Trust's data together and arrange it meaningfully. By doing this you clearly see the various narratives of what is happening on the ground.

Ultimately this means you make the best decisions based on hard facts. The only way to achieve the impossible is by making the right choices and doing it consistently.

Below: Just Some of the Areas We Have Helped to Improve with the Popular QlikView Platform.

- ↑ Information Governance
- ↑ Finance
- ↑ Patient Experience
- ← Inpatient
- ← Outpatient
- ← Theatre Utilisation
- Procurement
- A & E
- Trust Scorecard
- Risk Management

“QlikView, and partner QlickiT, enable us to rapidly turn the wealth of data we gather into useful Information and present it to our users in a way that is both engaging and innovative.”

Robin Harris, Imperial College Healthcare NHS Trust

The BEST Solution

QlikView has become the de facto solution for the NHS’s Business Intelligence needs. Powerful and flexible, it is unique in its ability to deliver Business Discovery – enabling even novice users to answer insightful questions on the fly.

The ability to hold millions of records in memory and cross reference it all simultaneously, combined with the fast, intuitive interface means that it is proved perfect for large organisations like the NHS.

Maximum data, minimum training and complete Trust-wide versatility has seen QlikView installed in over 150 NHS Trusts.

The QlikView Healthcare Specialists

QlickiT are the original UK QlikView specialists, officially recognised as the Most Consistent QlikView Partner. We are best known for delivering big-impact QlikView solutions into the NHS.

Our deployments follow our unique QlikView methodology developed over 8 years. It offers the fastest installation times, total ease of modification and the most optimised performance.

We are responsible for what we believe to be the most advanced QlikView project in Europe, at Imperial College Healthcare NHS Trust. Working together we have created over 50 different apps across the whole Trust. Just one of our apps there is saving over £40,000 of lost time every week.

No one is better positioned to help the NHS continue to achieve the impossible than QlickiT with QlikView.
