

# ClickiT Energy Intelligence Cockpit Application

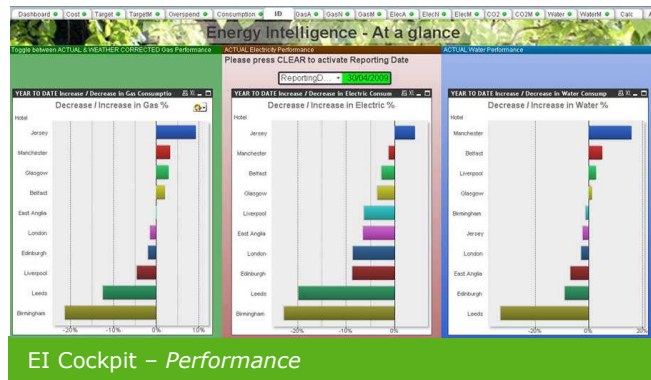

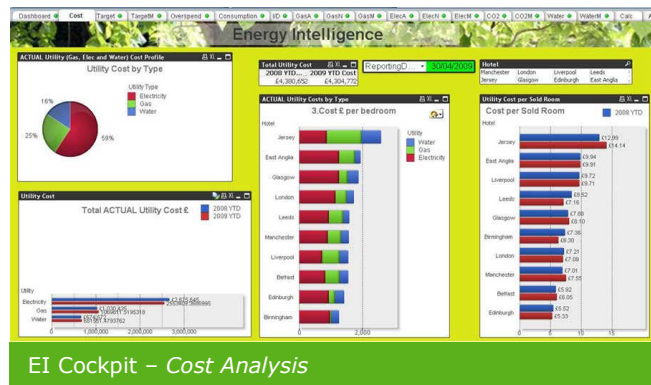

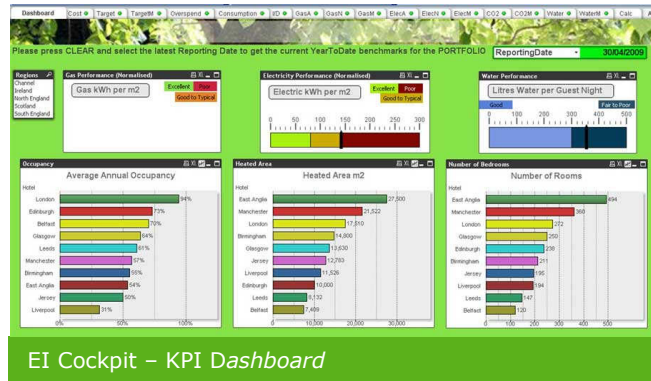

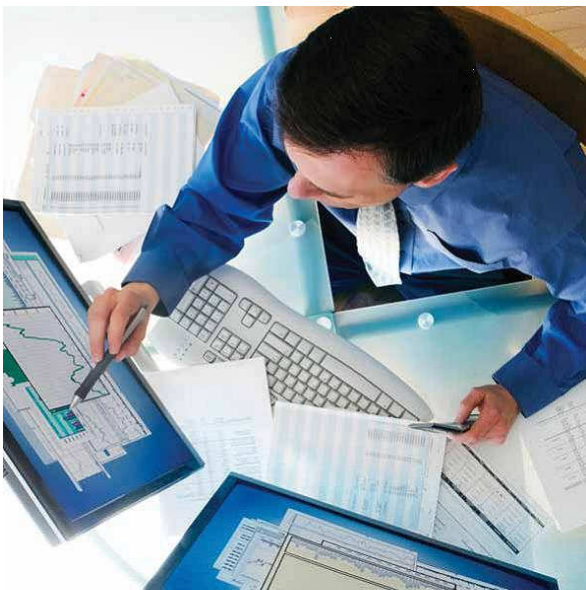

ClickiT Energy Intelligence Cockpit interactive dashboards will give you the Management Information and analytics you need to understand your energy usage and performance in incredible detail.

Consolidate your energy data across multiple sources and analyse the results in easy to understand interactive dashboards and reports. Energy Intelligence (EI) Cockpit is a single, centralised analysis platform for all your energy and carbon reporting needs, enabling a proactive approach to reducing cost and energy waste. You need timely energy management information that tells you what is really happening in your organisation relating to energy usage.

Your ClickiT EI Cockpit Dashboard application will give you the vital information you need, with interactive drill-down analytical capability to the lowest level of detail. Its power and flexibility will help drive informed decision making and resulting actions to improve your energy performance.

**ClickiT EI Cockpit interactive analytical and reporting application is built using the astonishing and internationally successful QlikView Business Intelligence tools.**

ClickiT's EI Cockpit application builds on years of experience in extracting the most from QlikView technology and in understanding the needs of effective Energy Management. You will be able to really get to grips with all facets of your energy usage in incredible detail within hours of installing the ClickiT EI Cockpit dashboard application.

# ClickiT Energy Intelligence Cockpit Applications

## ClickiT EI Cockpit:

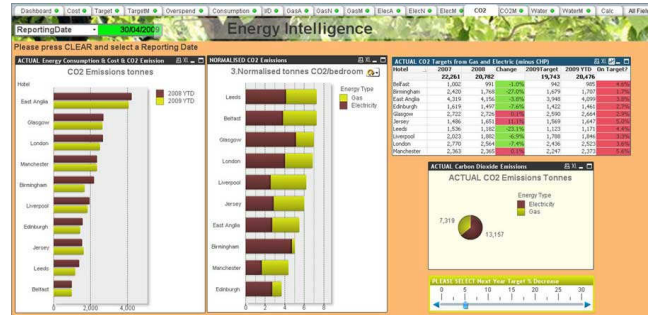

Analyse, report and distribute all information about your EI activities and performance with up-to-date data and rapid response. Track performance to targets across all energy categories, across locations and individual buildings. Monitor under/overspends to benchmarks along with CO<sub>2</sub> emission and consumption.

## ClickiT EI Cockpit gives you:

- High-level Dashboards with drill-down to lowest detail levels in only a few clicks.
- Full analysis of energy usage and costs across multiple dimensions: energy type, locations, periods, etc, etc.
- Target Scenario Planning.
- Normalised and Weather-corrected analysis.
- Ability to easily customise displays and reports to meet specific internal organisational requirements and changing needs.
- Alerts to email/SMS as key indicators are reached or exceeded.
- Multiple deployment options – desktop, browser, mobile, etc.
- Analysis is limited only by the data captured and held within your Energy-related systems.

## ClickiT EI Cockpit interactive dashboard applications cover:

- Energy Performance Monitoring
- Utility Cost Profiling
- Cost Monitoring: Actuals v Targets
- Under/Overspend to Benchmarks
- Consumption Analysis
- CO<sub>2</sub> Emission Analysis
- Potential Savings Analysis
- Normalised Analyses
- Scenario Planning
- and much more .....

EI Cockpit – CO<sub>2</sub> Emission Analysis
