

ClickiT Facilities Management Cockpit Applications

ClickiT FM Cockpit interactive dashboards will give you the Management Information and analytics you need to understand your business activity in incredible detail.

As an operator in the Facilities Management, Building Maintenance, Property & Estate Management and Building Services industries, you need timely performance management information that tells you what is happening in your organisation relating to your operational and general business activities.

Your ClickiT FM Cockpit Dashboard application will give you the information you need by customer, customer type, site, job, product, geography, contract manager, asset class, etc, as dashboards, reports and graphs and all with drill-down analytical capability to transaction level if required. Its power and flexibility will astound you and help drive better informed decision making and improved business performance.

ClickiT FM Cockpit interactive analytical and reporting applications are built using the astonishing and internationally successful QlikView Business Intelligence tools.

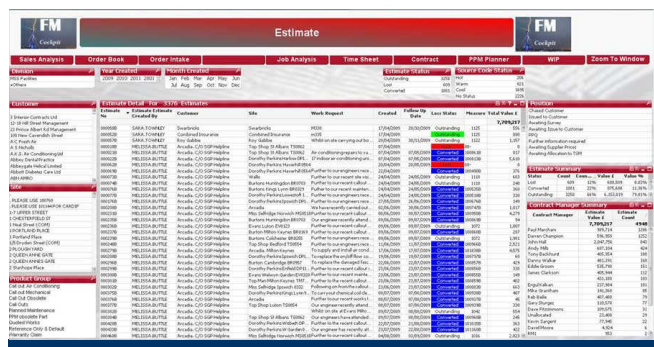

ClickiT's FM Cockpit applications build on years of experience in both the Building and Construction Sector information needs and in getting the most from QlikView technology. You will be able to start to understand all facets of your operational business in incredible detail within hours of installing the ClickiT FM Cockpit dashboard applications.

FM Cockpit – Job Analysis

FM Cockpit – Time Sheet Analysis

FM Cockpit – Estimate & Tender Analysis

FM Cockpit – Work-in-Progress Analysis

QlickiT Facilities Management Cockpit Applications

QlickiT FM Cockpit:

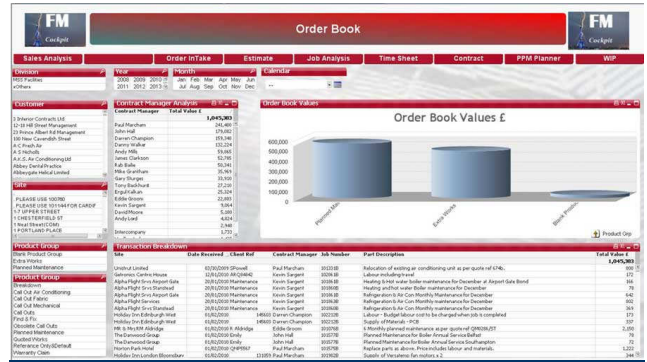

Analyse, report and distribute all information about your FM activities and performance with up-to-date data and rapid response. Track sales activity, work-in-progress and other key operational activities across multiple dimensions. Highlight bid success/failure, compare periods, analyse manager performance and drill down to full transaction level detail.

QlickiT FM Cockpit gives you:

- High-level Dashboards with drill-down to transaction level in only a few clicks.
- Full analysis of multiple facets of the business operational activities across multiple dimensions: by customer, site, product group, contract manager, period, status, asset group, criticality, job type, etc, etc.
- Timesheet Analysis and Job Analysis to SLAs.
- Ability to easily customise displays and reports to meet specific internal business requirements and changing needs.
- Alerts to email/SMS as key indicators are reached or exceeded.
- Multiple deployment options – desktop, browser, mobile, etc.
- Analysis is limited only by the data captured and held within your FM-related systems.

QlickiT FM Cockpit interactive dashboard applications cover these areas:

- Sales Analysis
- Order Book
- Order Intake
- Estimate Analysis
- Job Analysis
- Timesheet Analysis
- Contract Analysis
- PPM Planner
- Work-in-Progress Analysis
- and much more
