QLIKVIEW FOR SUPPLY CHAIN: WAREHOUSING AND DISTRIBUTION

Increasing visibility and efficiency

CHALLENGE

Warehousing and distribution processes require the management of both assets and data to ensure products and partially finished products are available for assembly to customer order where and when required.

Holding inventory is a major cost, made worse if stock is in the wrong place and requires moving. Running a warehouse incurs heavy fixed costs so managing the variable resources well is important. Utilizing warehouse resources efficiently is key to a low-cost storage operation. Warehouse management uses and generates much data about movements and condition of goods. Many logistics companies own considerable assets and in some cases their business model includes making such resources available to others.

Ensuring warehouses and distribution facilities have the inventory they need at all times to fulfill demand quickly is critical for the organization to have the right mix and profile of facilities to cater for different product, customer or market needs.

SOLUTION

QlikView and the partner community have built a number of 'QlikView Apps' to address and demonstrate capabilities related to this supply chain solution area.

QlikView for Warehousing and Distribution apps empower individuals and groups to make faster and better informed decisions by allowing them to:

- Access timely, accurate and consistent data from multiple sources to understand and manage performance
- Visualize how efficiently the total available storage potential is being used to understand the scope for performance improvement at current inventory levels
- Analyze warehouse and transportation fulfillment of orders and provide or suggest resolutions to meet delivery performance agreements
- Give visibility of warehouse constraints with the ability to analyze large volumes of data across related functional areas

CUSTOMER EXAMPLES

- Anji-TNT Automotive Logistics – "QlikView is crucial to our logistics operations because it saves 90% of our manpower in generating reports, it is three times faster in implementation than other vendors, and its integrated analytics enable us to quickly analyze our inventory, warehouse and supply management" *Sili Yuan, Director, Information Technology Department, Anji-TNT Automotive Logistics Company Ltd*
- Multinational Consumer Goods Manufacturer – uses QlikView to optimize shipments to their largest customers, analyzing the order patterns and order history before optimizing palletization, reducing delivery costs and improving margins
- Beckett Associates – "QlikView helped immensely with the integration of additional data sources from our acquired businesses. QlikView has enabled us to manage supply chain and react to trends as we see them. Without the help of QlikTech we would still be accruing unusable inventory in the warehouse." *Heather Sterk, IT Director, Beckett Associates*

ABOUT QLIKVIEW

 QlikView is the leading Business Discovery platform, delivering true self-service BI that empowers the business user by driving innovative decision-making.

Contact your QlikView representative to schedule a discussion and live demonstration related to this solution area.
